F O R E W O R D

The second volume of "Early Missourians and Kin" is a continuation of the creation of a "Missouri Cousin" tree of kinfolk of the Missouri pioneers. With this volume, the total number of individuals represented have doubled to more that 14000.

Originally, no thought was given to the expansion of the tree. It was my belief that the "limbs" were extended away from the early Missouri settlers about as far as practical to justify the book title. My opinion has not changed. But, with the expansion of the tree, a new value appears, and a new title seems more appropriate. It is probably too late to change the title. However, I refer to the book with increasing frequency as though the title is "Missouri Cousins".

With the publishing of volume one, many have written to me showing that they and their kin are qualified to be "Missouri Cousins".They have done this by supplying me with their own family tree and indicating just where their branch connects to the Missouri tree. By expanding the tree, its value is less limited to those with deep Missouri roots, and more as a depository of Family Groups.

In the archives of many families, there are unpublished genealogical data of value that may never become available to the general public, for many reasons. Publishing costs and capabilities of presentation, are examples. They may well be the result of many "man-hours" of research and compiling, and their collection of data may have required years to assemble. This book is in part a composite of many of these family compilations.

Without some cooperation, no one individual could possibly have access to even a small portion of this data, nor be able to devote the time-hours required to assemble the information.

With the publication of the first volume, the response in voluntary assistance and the supply of new data that continues to be added to my files, almost compels me to process the information and

expand my tree. By a strict adherence to the criterion that all on the tree must be kin, the tree has the continuity to be of special interest to those with at least some semblance of Missouri heritage.

A very large part of the data in volume II was supplied to me by book purchasers and others who became interested in the project. This has eliminated the neccessity of my own researching, and has kept me occupied with essential correspondence and processing. To all who have helped me, I am very grateful. At the risk of omitting some deserving contributors, I shall name some of them who have made sizable contributions of data and have been very cooperative:

Book No.	
K64A	Mrs.Bonita Bailey, Las Vegas,Nevada
K44A	Mrs.Pamela Baker Oklahoma City,Oklahoma
T54A	Mrs.Lucille Beckham, McAlester,Oklahoma
J90A	Mrs.Mary Bowen, San Diego,California
S86A	Mrs.Jayne Clark, Ottawa,Kansas
L29A	Mrs.Virginia Crandall, Burlington,WA.
V64A	Mrs.Valaska Dahlgreen, Portland,Oregon
G80B	Mrs.Lenora Dickens, Canon City,Colorado
P49A	Mr. William LaPorte, Wetumka, Oklahoma
I71A	Mr. Joseph Mayfield, Woodland Hills, CA.
C59Aa	Mrs.Ruth McQuerry,Orange,California
N32A	Mrs.Linnie B Mills, Corpus Christi,Texas
Q53A	Mrs.Jean Mitchell,LaFeria, Texas
V87A	Mrs.Shirley Musick,Walla Walla,Washington
R35A	Mr. William Schwegler,Florissant,Missouri
D92Aa	Mrs.Charline Shockley, Santa Cruz,Caliornia
C86A	Mr. Charles Sheppard, Springfield,Missouri
R71A	Mrs.Laverne Shull, Centertown,Missouri
F92H	Mrs.Marjorie Smith,Kent,Washington
R65A	Mrs.Kathie Walsh,Geneva,Illinois
S41Ba	Mrs.Shirley Ward,Anadarko,Oklahoma

Two additional contributors who have not at this time established their kinship to the "Missouri Cousins", but are with little doubt close kin, deserve special thanks. Both have contributed much

valuable data found in the book, and have been unselfish in willingness to assist me.

They are:
Mrs.Joseph Billy of Renton,Washington.
Mrs.Joseph Crouse Burlington No. Carolina.

As with the Missouri Cousin tree established here, using the Missouri pioneers as a nucleus, I believe that other State or Colony "Cousins" might be formed from the roots of other frontiers. One essential ingredient would probably be that there was sufficient time expended in inter-marriages due to isolation of a group from other communities. This could be found in colonies primarily in existance perhaps prior to about the middle of the 19th Century. After the expansion of the railroads, and improvement of travel otherwise, this community heritage became a decreasing tangible factor.

Within the Missouri Cousin tree, there is one other Colony tree, formed in a similar manner. It is the Plymouth, Massachusetts "Mayflower Tree", that joined the Missourians by having ancestors to some "Missouri Cousins". They are:

Mayflower Passengers	Missouri Cousin Identification No.
John Tilley	W10A
Elizabeth Tilley (dau)	W11A
John Howland	W11Aa
Richard Warren	W25A

A fifth, is the wife of John Tilley, listed as Elizabeth Comyings, (W10Aa). Her maiden name is based on an assumption that is not fully documented.

More than 50% of the Mayflower passengers, greater in number than those who survived the first winter in America, are kin and appear in the Missouri Cousin list.

Instructions as to the use of the data in this book are given on pages 41 to 43 in volume I. They

are repeated in this volume. Commnents and examamples are different.

A discussion of authenticity of the data in this book is shown on page 358, Volume I. Even though extreme attention was given when discrepancies appeared, or creditability was questioned, there is no doubt that errors exist. Considering however that the data sources were to a great extent from family records, supplied by those usually consider to have the best "first hand" knowledge, I believe the data is highly accurate.

FOREWORD	1
BOOK FORMAT	6
DATA USE PROCEDURE	7
PART I: INDEX AND GENEALOGICAL BIOGRAPHIES	13
PART II: SIBLING GROUPS	186
PART III: GENEALOGICAL CHARTS	337

BOOK FORMAT

SERIAL NUMBERS

Each individual is assigned at least one serial number, depending on the number of positions a person occupies on the Master Genealogical Chart. However, the Index shows only one and the others may be found in Part II, Sibling Groups. The one listed in the Index is the person's "prime number" and all others are designated "secondary".

COMPOSITION: The number of characters comprising the Serial Number varies from 3 to 6. A fully extended serial number of 6 characters would be represented in this manner: L83Cbm made up of 4 parts:

1	2	3	4
L83	C	b	m

Part 1: L83 composed of a capital letter, followed by two numbers. This part designates a certain Family Group, termed in this book "Sibling Group". The use of the word sibling is preferred since it applies only to the sibling members of that group. Their parents, spouses and parents of spouses shown in this group fall into other Sibling Group categories.All members of this group have the same prefix L83 even though the mother may not be the same. A maternal change is indicated by heading her births with her maiden name.

Part 2: "C" in capitals indicates a letter assigned to a specific member of the group L83. Normally, if the birth sequence is known, the letter "C" is given to the third birth, in alphabetical order. Once this letter is attached to a certain member, it does not change even though later information discloses a different sequence.

Part 3: "b" in lower case is a suffix designating a spouse of the Sibling member. The letter "a" indicates first marriage (if the sequence is known), "b" the second etc.

Part 4: "f" of "m" in lower case is added to the serial number of a spouse, to represent her parents. The letter "f" indicates father, and the letter "m" mother.

LEGEND UNDER COMMENTS: b.p. birth place, m. marriage date, d. death date,

DATA USE PROCEDURE

Instructions as to how to make use of the data as presented in "Early Missourians and Kin", are given in Volume I, pages 41 to 43. They are repeated here and new examples are shown.

The magnitude of the range of genealogical coverage is such that it was essential to design an unique format to satisfy the requirements for this book, especiallly to provide unlimited expanding capability. The resulting product, therefore, requires some study before it can be employed to obtain the best use of the data.

A step-by-step procedure follows, using examples to illustrate the composition of a family genealogical chart.

Project: Charting the kin of John T Mason

PART I: This is the Index section. In addition, the individual's prime serial number and genealogical data are shown. In forming a family chart, this section is the normal begining point.

Find: Mason John T. (page 112) The complete tabulations with this name is:
Mason John T L26A 1838Jun8 b.p.N.C. m.1861Dec.26
d.1898 Mar.18 Ark.,Gentry

meaning: John T Mason has prime serial no. L26A. He was born June 8,1838. His birth place was North Carolina. He married Dec.26, 1861, and died March 18,1898, at Gentry, Arkansas.

Record his genealogical biography for future use.

Refer to: Part II: SIBLING GROUPS:This section is the most important working section. In it are revealed the parents, and other ancestors; the subject's descendants; and aunts, uncles, cousins and other kin to the extent of the data recorded.

Find the Sibling Group [L-26] (page 231)

The complete data for this group is shown:

[L-26] MASON L25B
John Jefferson/Emily C Gibbs
L26A JOHN T -L27-
L26Aa Hall Sarah A (L66A)
L26Aaf Hall Robert (L66Aa)
L26Aam --- Mary
L26B MATILDA
L26C ELIZABETH
L26Ca Bergin Merritt
L26D JOSHUA
L26Da Parker Sarah Catherine
L26E WILLIAM

Line #1: Sibling Group Serial No.[L-26]
Family Surname: MASON
Father's serial No. L25B
Line #2: Given name of father/maiden name o
mother: (John Jefferson/Emily C Gibbs)
L26A to L26E: All names in CAPITAL letters are th
Siblings (Serial numbers of 4 characters each
L26A JOHN T MASON -L27-
L26B MATILDA MASON
L26C ELIZABETH MASON
L26D JOSHUA MASON
L26E WILLIAM MASON
Spouses: L26Aa Sarah A Hall (L66A) Spouse of L26
L26Ca Merritt Bergin Spouse of L26C
L26Da Sarah Catherine Parker Spouse o
L26D
Parents of spouses:
L26Aaf Robert Hall Father of spouse L26A
L26Aam --- Mary Mother of spouse L26Aa
(Maiden name unknown)

John T Mason, L26A: The symbol -L27- is added. Th
hyphen prefix and suffix, signify that his des
cendants are found in the Sibling Group L27.

Sarah Hall has an added serial number in parenthe
sis, (L66A). This is another number for Sarah. I

the L66 Sibling Group, (page 235) she appears as a sibling, whereas she is a spouse in L26. James T Mason has an added L66Aa. In group L66, he is a spouse of L66A, and in L26, a sibling.

InG Sibling Group L45, (page 233), L45Aa and L45Ab signifies that L45Aa, Virginia Jones is the first wife of L45A, and L45Ab, Rebecca Hastain, the second.

In Sibling Group L46, note:
(2) Rebecca E Hastain. This signifies that all of the siblings below this note are children of Rebecca E Hastain, not Virginia Jones.

In this same sibling group, L46A is shown:
L46A WILLIAM WASH. -L61- (L28Daf,L59Ca)
This signifies that his children are in L61, and he is the father of L28Da, and the spouse of L59C.

PART III: GENEALOGICAL CHARTS
The Master Chart of "Missouri Cousins", representing the persons in both Volume I and Volume II of this book is a composite of 62 individuals charts, 30 in Volume I and 32 in Volume II. Their primary purpose is to enable a researcher to quickly scan wide ranges of kinships.

By using these charts, a kinship can be established between any two persons found in the indices of the two volumes. They are, however, not essential in the formulation of personal family charts. Part II, contains all of the data necessary for this purpose. But, they do serve as a good check on the results of compiled work.

Each chart shows the position of its attachment to the Master Chart in one or more places. It is, therefore possible to not only scan the relatively obvious kinships of all those represented on one chart but to progress into the realms of all of the charts.

Since the practical limit of use is confined to one chart, the method of wider use is described only briefly here. All charts in Volume II show a

connection to a chart in Volume I or to another one that does have a connection. The practical procedure is to move first into Volume I and then make use of the connecting suggestions shown on page 357 of Volume I. Various routings of kinships can be made, depending on the ingenious solutions found by the researcher. No offer is made as to how the most direct lines can be established.

THE CHART FORMAT

The charts are not generally unique in composition but there are parts of the format that have been adopted for unusual situations. The following examples should clarify their use.

```
See Chart L2,Column #1: (page 346)
  MASON
L22A (g.g. grandfather of John Mason)
 :
L23A (g. grandfather of John Mason)
 z:
xL24A (grandfather of John Mason)
 :L24Aam(mother-in-law of L24A)====L31A
 :                    L24A equals L31A,same person
L25B (father of John  Mason)
 :
L26A JOHN MASON
 :
L27A (son of John Mason)
 :
L28D (grandson of John Mason)
 :
L29A (g.grandson of John Mason
```

*Note:The characters G76 actually represent all the siblings,G76A, G76B, G76C, G76D and G76E. However, only G76C is shown, since Anthony Vaughan is the only one who has descendants recorded. If no descendants were shown for either Anthony, or the others, the symbol [G76] would be used instead of G76.

```
See Chart N2

G77D G77B G77G
  :
G78B (Female)
G78Ba(Husband)
DOBSON
(Husbands sur-
 name)
```

COMPILING A GENEALOGICAL CHART

Example: Preparing Family Chart for John T. Mason: As previously stated, his name is located in the Index first, and his biographical data is noted.

Refer to his Sibling Group [L-26], shown in Part II. (page 231)
Ancestral Study: Father of John Mason (L26A), was John Jefferson Mason L25B, and mother's maiden name Emily C Gibbs (L25Ba).At this point some data on ancestors of Emily Gibbs can be obtained by noting in Group L25 that her father was Joshua Gibbs L25Baf, and also, the serial number (L33A). Her mother was Rebecca Connelly, L25Bam.
Referring to Joshua Gibbs (L33A), (page 232) his father is shown as John Gibbs L32A,mother unknown.

Both of these lineages can be researched more by continuing with the procedure outlined. Along the way, brothers and sister,aunts, uncles, cousins, nephews,nieces etc. can be found and recorded.

Descendants of John T Mason:

In Sibling Group L26, on line with L26A John T Mason is a notation -L27- denoting that his children may be found in the L27 group. In L27, a son L27A Joshua William has the symbol -L28-. In L28 will be found grand children of John Mason.

L28A RUTH
L28B VENETIA
L28C WILLIAM
L28D JOHNNY
L28E MACK

Johnny Mason L28D has -L29- where g.grand children of John T Mason may be found. From Johnny, a Carter lineage can be created through William Carter L28Daf having a second serial number L46A. In Group L46, the parents of William Carter are shown: James K Carter, and Virginia Jones, and the children of William are in L61.

Owsley lineages can be developed through L46Aa, using Sibling Group L59C.

There are endless possibilities of expanding the Family tree of John T Mason, depending on the ability of the researcher to understand and work with the data.

A sample of the Family Chart that may be created for John T Mason is shown in Chart L2, and this can be expanded by moving into other charts. All of this can be augmented by adding data not in the book such as personal family records. A Family Group thus formed might be more detailed in that all of the Siblings would be shown, not merely those having descendants, and names could be substituted for the serial numbers.
